About Kinnarps	34

Spaces for different activities

In the course of a day, a lot of different learning situations take place in schools and other educational environments. Various activities that require a particular degree of focus and spaces that support optimised learning. A well-planned, sustainable interior solution is designed according to identified needs, where the features, design and location of the interior facilitate, invite and support teaching and learning.

Let yourself be inspired by different spaces and how they can be designed flexibly and sustainably for safety and focus. We're here to help you, whatever your starting point – from needs analysis and interior design solution to delivery and follow-up.

Entrance

The entrance gives the first impression. Here, everyone should feel welcomed and immediately get an idea of the school's vision. With the right interior design, the entrance can also be a complement to other learning spaces during a school day, for example as a presentation area, meeting space or space for group work. Remember to choose durable materials, as this area is used frequently throughout the day.

Create rooms within a room

Use furniture, plant dividers, textiles, rugs and lighting to divide the entrance into a number of smaller, inviting oases.

Pio

Modular sofa that can be put together in many different combinations. A gap between the seat and the back prevents dirt from getting caught.

Fields

Range of sofas, easy chairs, pouffes and tables in various sizes and variants. Available with or without swivel function.

Vagabond

Functional, creative project table, available in several variants, ideal for collaboration. The table has lockable castors and a host of functional accessories, such as a whiteboard.

Grow

Flexible plant holder och divider that can be arranged free-standing, in groups or in rows. Create different types of zones and small green oases. Choose from different heights and colours.

Hebe

Easy-to-place coffee table with metal tubular legs, available in several different finishes. The tabletop is available in durable laminate.

Trixagon

Stool that is easy to move and group in different formations.

Common spaces

Common spaces are the large shared, communal areas where students and staff come together during the day. With varied interior design and zoning, you can create a cosy and safe learning space that encourages various activities, such as socialising, relaxation, informal learning, collaboration and individual work. Different digital solutions can support you with up-to-date information or schedules.

Trix

Modular sofa that can be put together in many different combinations. The design makes it easy to clean underneath the furniture.

Leia

Simple, stackable plastic chair with a nice yielding effect in the back for comfort. Easy to clean and disinfect. Choose between upholstered or non-upholstered.

Oberon

Sturdy table in different heights, sizes, shapes and materials.

Space - Kid’s Corner

Storage unit that can be assembled in many different combinations. In addition to storage units, it also creates a safe hideaway for students.

Vibe

Desktop screen that reduces distractions and creates focus areas for students.

Gino

Modular range of sofas that can be assembled in many different combinations. A gap between the seat and back makes it easy to keep clean. Choose lockable castors for extra flexibility.

Classroom

The interior design and layout of the classroom need to be flexible to allow seamless switching between different learning situations, such as lectures, group work, individual work and discussions. Interior design that encourages movement and can be easily adapted to the learning situation provides a sustainable foundation in the classroom. It's also important to minimise distractions here, to improve focus and thereby promote learning.

Promote safety and focus by encouraging movement and minimising distractions

- Choose furniture designed with micro-movements and offer the opportunity to alternate between sitting and standing.
- Furnish using earthy colours, avoid patterns and scale down impressions.
- Use screens, textiles and furniture to divide space.

Origo

Range of desks in a variety of shapes and two heights. Desktops with sound-absorbing properties and castors for extra flexibility.

Elevate and Xpect

Student chair with yield in the back and height-adjustable table for the best possible ergonomics. The chair's seat depth and height can be adjusted, allowing it to grow with the student.

Xpect

Stackable, suspendable chair family, available in several models and heights. Embracing, flexible back counteracts static sitting.

Vibe

Range of floor, wall, ceiling and desktop screens in various finishes, with accessories such as whiteboards and hooks. Helps create a good acoustic environment, and can screen off a space and create a cosy feel.

Junior

Practical school desk that has been specially developed to provide every student with functional storage close at hand.

Space

Multifunctional student storage unit on castors that can also be used to divide rooms. Available options for the back are a whiteboard or sound-absorbing panel.

Group room

The group room can be an extension of the classroom. The interior design here should support both group work and focused, individual work. Tables that can be easily furnished in different combinations, free-standing screens, whiteboards and adjustable student chairs provide a sustainable foundation. Supplement with other seating furniture to encourage varied sitting positions and recovery.

Ergonomic, flexible and adaptable interior design solutions, designed for today's individuals and activities, but also ready to meet future needs and challenges, provides the conditions for sustainable and future-proof learning spaces.

Leia

Simple, stackable plastic chair with a nice yielding effect in the back for comfort. Easy to clean and disinfect.

Origo

Range of desks in a variety of shapes and two heights. Desktops with sound-absorbing properties and castors for extra flexibility.

Vibe

Range of floor, wall, ceiling and desktop creens in different finishes, with accessories such as shelves and hooks. Creates a good acoustic environment and a cosy feel.

Oberon

Sturdy table in different heights, sizes, shapes and materials.

Plint

Stool that allows students to choose their own way of sitting. Available in different heights and sizes, and with fixed legs or rocking frame for active sitting.

Frisbee

Sleek, stackable stool in three heights and several different colours. Choose between upholstered or non-upholstered seat.

Assembly hall

The assembly hall is a dedicated room or part of a larger open space where large numbers of people can gather in a convenient way. It is often used for larger gatherings, but the utilisation rate can be increased with an interior design solution that can be adapted as required. This enables the assembly hall to be used, for example, to hold exams. A good acoustic environment is important, which can be created with the aid of acoustic panels, screens and upholstered furniture. Adapted technological solutions make it easy to connect and put on presentations or performances.

Important factors when placing sound absorbers on the wall:

- Quantity in relation to size of room
- Location in the room
- Material thickness
- Distance to wall

Leia/Chair trolley

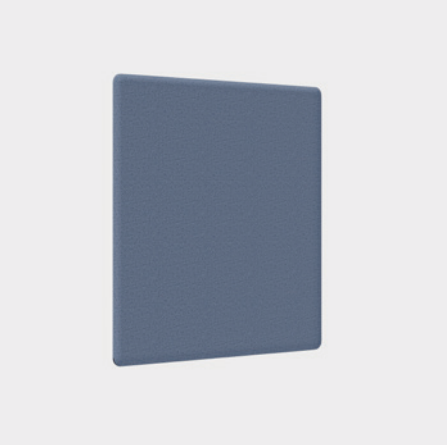
Simple, stackable plastic chair with accompanying trolley. Easy to clean and disinfect.

Nilo

Practical, durable wooden shell chair in several variants that form a complete chair family. Connectors are available as an option.

Alm

Like an elm in nature, this clothes rack creates natural shadow play. The branches provide practical hooks for hanging up clothes.



Vibe

Range of floor, wall, ceiling and desktop creens in different finishes, with accessories such as shelves and hooks. Creates a good acoustic environment and a cosy feel.

Foldex

Foldable table that can be set neatly to one side to provide quick access to the floor surface when required.

Space Pulpet

Lectern with castors, easy to roll in the room. Provides a functional work surface and practical storage unit, within easy reach.

Library

The library is a space that can promote a joy of reading and encourage students to be responsible about their studies. The interior design here creates a calm, safe space where people can sit comfortably, either alone or together with others. The library is also an optimal space for rest during the school day. It's a place to which students can retreat and recharge their batteries. In addition to books, there are also technological solutions in place, where students can do their own research.

Three tips for an accessible and inclusive school library

- Divide the space into clearly defined zones that encourage different types of use, e.g. a quiet zone for reading or self-study, and an active zone where students can discuss and learn together.
- Use the interior design to create safe corners, where students can find their own space to take the time they need to recover. It's a good idea to choose upholstered furniture that makes it more comfortable and strongly contributes to a good acoustic environment.
- Plan the layout for easy access and enable staff to have a good overview of the entire area.

Vibe and Oberon

Ergonomic focus area, created with a desk and screen wall, where students can study undisturbed.

Fields

Range of sofas, easy chairs, pouffes and tables in different sizes and variants. The easy chair is available with a swivel mechanism with automatic return to the neutral position.

Fields

Range of sofas, easy chairs, pouffes and tables in different sizes and variants. A power socket in the base is available as an option.

Trix

Comfortable easy chair that takes up little space. Choose from hundreds of fabrics and create your own look.

Space

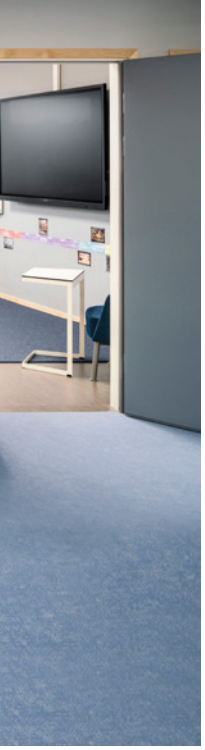
Storage solution that can be built into a number of different combinations. Combine open shelves and closed doors according to your needs.

Origo

Range of desks in a variety of shapes and two heights. Desktops with sound-absorbing properties and castors as an option for extra flexibility.

Corridor

The corridor is a place where students meet up and socialise while waiting for their next lesson, or between different activities. With a flexible interior design solution that can be adapted to different learning situations, it can also become an extension of the classroom. You can use it, for example, to create extra study spaces for both individual work and group work when the need arises. By colour-coding corridors, you can simplify navigation and increase safety in the school.



Fields

Range of sofas, easy chairs, pouffes and tables in different sizes and variants. Choose a high back to create a room-in-a-room. A power socket in the base is available as an option.

Space

Multifunctional storage solution that also offers seating space.

Libra

Easy-to-place bench with one, two or three seats to give each individual their own space.

Frame

The students' favourite hideaway! An ideal piece of furniture for corridors. Can be mounted to the wall for safety.

Lean In

Multifunctional, sound-absorbing and decorative piece of furniture that offers a comfortable surface to lean against.

Space

Cabinet that provide plenty of storage, choose ideally closed doors to minimize distraction.

Canteen

The canteen is usually used for just a few hours a day, but a varied interior design solution can increase the utilisation rate. By dividing the canteen into zones with different sitting and standing options, you can create areas that support both individual work and group work. As the canteen is particularly exposed to wear and tear, you should choose materials that are hard-wearing and wipeable. Create a good acoustic environment with upholstered furniture, sound-absorbing table tops and absorbers on the walls.

Lexie

Suspendable wooden chair that frees up floor space and facilitates cleaning. There is a soft suspension guard beneath the back arch.

Elsa

Simple wooden table that exudes a soft, warm feel. Available in different shapes and heights.

Riff

Stackable chair with rounded back. Can be hung on a table to facilitate cleaning.

Vibe

Flexible screen on castors that can be connected as required. Creates a good acoustic environment and effectively divides large areas for a cosier feel.

Asto

The perfect table for canteens. The leg design makes it easy to clean under the table. Choose a laminate table top for extra durability.

Deep Forest

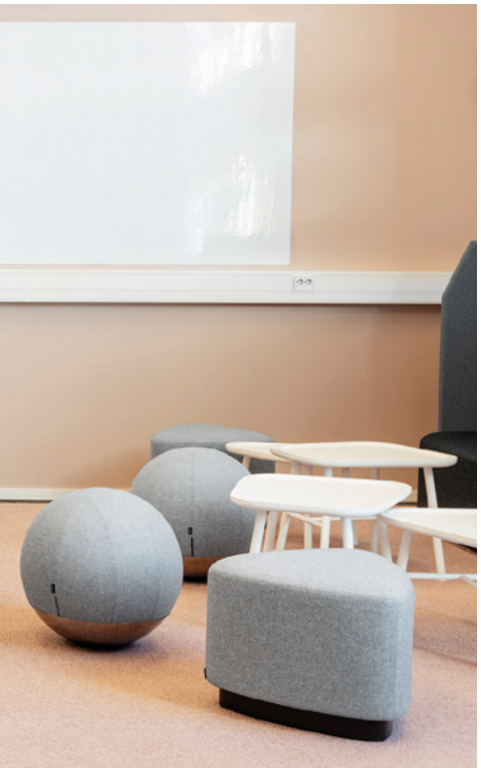
Sound-absorbing wall panel with recycled textile filling that also becomes a decorative feature.

Makerspace

Makerspace is a space for practical work where the focus is on creating, whether with textiles, wood, images, music, technology or laboratory work. The interior design here needs to allow projects to take up space, while at the same time it should be easy to stow away the day's work until the next lesson. This is why a generous storage solution is important, as are durable materials, as the interior design is subjected to high levels of wear and tear.

Make room for creativity

Furnish with flexible and modular interior design, such as tables on castors and stackable chairs, which can be easily rearranged to support different types of projects and activities.



Space

Cabinet that provides a lot of storage space. Select closed doors to minimise distraction or glass doors to create a display area.

Frisbee

Sleek, stackable stool with upholstered or non-upholstered seat. Choose artificial leather for easy cleaning and disinfection.

Origo

Range of desks in a variety of shapes and two heights. Desktops with sound-absorbing properties, and castors as an option for extra flexibility.

Xact

Student chair with great ergonomics. Height- and seat depth-adjustable to grow with the student. Choose between upholstered or non-upholstered seat.

Jig

Stackable chair that is easy to take out or put away. With armrests, the chair can also be hung up to facilitate cleaning.

Foldex

Foldable table that can be set neatly to one side to provide quick access to the floor surface when required.

Meeting space

The meeting space is a versatile area for both planned and spontaneous meetings. It can either be in a separate room or part of an open space, the former being preferable if it's to be used to discuss sensitive topics. The meeting space is often equipped with technology, which makes it ideal for presentations and video conferences.

A meeting chair with castors and swivel function encourages small movements during meetings without disturbing others. This keeps you energised and focused for longer!

Siro

Range of chairs available in several different variants. Offers good comfort with suspension in the seat and nice yielding effect in the back.

Multicom

Range of tables that can be built in many different configurations. Everything from round meeting tables to large, rectangular or oval conference tables.

Koy

Hybrid chair/easy chair for different types of meeting spaces and social spaces.
The chair's innovative tilting mechanism encourages and follows the user's movements.

Oberon

Sturdy table in different heights, sizes, shapes and materials.

Fendo

Comfortable armchair with an embracing design. Available with several different frames.

Opti

Solutions that make your working day easier, such as power sockets, CPU holders, pressure-relieving armrests for desks and adjustable monitor arms.

Open workstation

Workstations in an open space can be either personal or shared. Here you can work on your own, while still being close to your colleagues. The interior design can be tailored to make these spaces suitable for different types of focus levels.

Elevate

Height-adjustable table, controlled by a lever under the table. No power or charging is required, making the desk flexible and easy to place.

Nexus

Table family in a simple, timeless design. Available in different heights and shapes, and with integrated solutions for technology.

5000

Comfortable task chair that can be adjusted to the user's needs. The back and seat move synchronously, offering varying working postures that counteract static sitting.

Plus

Encourages dynamic sitting and ergonomic working postures, with features including an adjustable headrest as an option. Offers great comfort and is available in several colours.

Capacity

Multifunctional range of storage units with cabinets for personal or shared storage. The modular design makes it possible to build a unique solution based on needs.

Space spoc

Multifunctional cabinet that provides an unloading area and storage, and can divide a room when needed.

Workstation in a room

A workstation in a separate room is a place for individual work that requires a high level of focus. It's also ideal for holding digital meetings or making phone calls. The workstation can be either personal or shared.

Three tips for the workstation:

- Furnish with a height-adjustable desk to enable switching between standing and sitting.
- Choose a task chair that encourages positive movement. Sitting does not have to mean sitting still.
- Plan for professional digital meetings. Bear in mind that the room should be well lit and furnished in neutral colours with simple decorations.

Series P

Sturdy, height-adjustable table which can easily be fitted with a desktop screen for a good acoustic environment and to enable high-focus work.

Plus

Encourages dynamic sitting and ergonomic working postures, with features including an adjustable headrest as an option. Offers great comfort and is available in several colours.

Siro

Range of chairs available in several different variants. Good comfort with suspension in the seat and nice yielding effect in the back.

Opti

Solutions that make your working day easier, such as power sockets, CPU holders, pressure-relieving armrests for desks and adjustable monitor arms.

Vibe

Range of floor, wall, ceiling and desktop screens in different finishes, with accessories such as shelves and hooks. Creates a good acoustic environment and a cosy feel.

Capella

Chair with great ergonomics for those sitting for long periods of time. The innovative Freemotion® mechanism creates a natural movement in the seat and back that promotes active sitting.

Space for telephone / digital conversations

A secluded space that is either a closed area or part of an open space. There is room for one person to take calls on the phone or a computer. Ergonomic interior design and adaptable lighting allow for both short and long calls.

Oktav

Sound absorber for walls, partly made of waste material, which can be combined in many different colours.

Deli Lounge

Comfortable easy chair with a reclined, enveloping shape. The two-part design provides options for using fabric in different colours and playing with different looks.

Fields

Easy-to-place table with a minimalist design. Part of a range of sofas, easy chairs, pouffes and tables in various sizes and variants.

Matsumoto

Versatile laptop table that makes a convenient work surface or end table. Easy to place, thanks to its soft contours and minimalist design.

Fields

Range of sofas, easy chairs, pouffes and tables in different sizes and variants. Choose a high back to create a room-in-a-room. A power outlet in the base is available as an option.

Point

An easy chair with high back that screens off, dampens noise and creates your own room-in-a-room. An integrated power socket is available as an option.

Space for dialogue / Quiet room

This private space allows for undisturbed conversations. A useful place if you need, for example, to discuss sensitive topics or confidential issues. The space has a relaxed atmosphere and is often in an area where there is no cross-talk.

Daybed

Bed that offers the opportunity to rest at the workplace. The design of the mattress and pillow makes it a comfortable bed to lie down on.

Neo Lite Soft

Easy chair with a slightly lower seat height that is suitable for relaxed sitting. The fabric and frame are available in several different colours.

Fields

Range of sofas, easy chairs, pouffes and tables in different sizes and variants. Choose a high back to create a room-in-a-room.

Deep Forest

Sound-absorbing wall panel with recycled textile filling that also becomes a decorative feature.

Invito

Sturdy, comfortable easy chair with a rounded back. Ideal to relax and read for a while, or why not place some easy chairs around a table for group discussions?

Central

Sleek easy chair with a clean design and beautiful stitching details on the back.

Staff lounge

A relaxed area that is dedicated to staff. It is an important space where you can recover, socialize and meet in an informal environment. You can eat your lunch here, have a coffee with your colleagues or hold meetings – both planned and spontaneous. The staff lounge is a perfect complement to the other spaces in the school. The interior design invites you to relax, while also serving as a temporary workplace.

Allé

Plant holder that creates happier, more pleasant spaces with plants. Ideal when you want to divide or create different zones in a space.

Scandinavia

Sectional sofa with a high level of comfort and timeless design. Available with removable upholstery, making it easy to freshen up.

Kalmia

Sturdy wooden coffee table. A number of tables arranged in groups create attractive combinations that encourage spontaneous conversations and meetings.

Arriba

Sofa with soft, comfortable padding that provides excellent comfort. The armrests are shaped to allow you to get closer to the table for good sitting ergonomics.

Fields

Range of sofas, easy chairs, pouffes and tables in different sizes and variants. The easy chair is available with a swivel mechanism with automatic return to the neutral position.

Cap

Small and light stackable stool. Easy to bring out to create additional seating. Made of moulded felt for sound-absorption.

- PRODUCTION IN SWEDEN
- TOTAL INTERIOR SOLUTION PROVIDER
- ERGONOMICS AND WELLBEING IN FOCUS
- QUALITY PRODUCTS DESIGNED TO LAST

The sustainable choice since 1942

Are you planning new learning spaces? We help you design flexible environments that last over time. At Kinnarps, we create truly sustainable interior design solutions. We have devoted ourselves to this every day since the business started in 1942. This involves focusing on creating real benefit, for our customers and for the environment. With production in Sweden, we have control over the entire chain, and our production ethos is to make the best possible use of existing resources. We put strict environmental requirements on our products, all of which have been tested according to various certifications and ecolabels, and therefore do not contain any unnecessary or harmful chemicals.

We are one of Europe's leading total providers of interior design solutions. Our vision is to help schools create sustainable and healthy learning spaces with a focus on learning.

Buying interior design for new learning spaces can feel substantial, difficult and costly, but it is really a matter of investing time and thought in the beginning to make it a safe and thoughtful investment. We are here for you, whatever your starting point - from needs analysis and interior design solutions to delivery and follow-up.

Services for a sustainable and circular future

NEXT EDUCATION® LEARNING SPACE ANALYSIS

Our needs analysis helps you gather valuable knowledge and data before designing your new spaces. With specially developed tools, our experienced learning space strategists guide the management team through establishing the vision, goals and framework for the project. Staff and students are involved in a carefully considered way, and needs and work patterns are mapped out in a methodical way.

Your results are presented in a report, together with a floor plan and our recommendations for the physical environment. The factual data makes it easy to follow up on how your new learning spaces are working from year to year.

INTERIOR DESIGN SOLUTION – LEARNING SPACES FOR SAFETY AND FOCUS

How do you create safe learning spaces that promote the desire to learn? From vision to reality. We help you translate the results of your learning space analysis into a design concept and actual drawing.

INSPIRATIONAL LECTURE

In this lecture, we share practical knowledge and experience of physical learning spaces and focus on generating new ideas and ways of thinking about how the school's premises can be designed for optimised learning.

WORKSHOP – DESIGN YOUR IDEAL CLASSROOM

This workshop gives you the opportunity to use tangible aids for team-building among your staff and to develop new ways of thinking about how your existing or future learning spaces can be designed to better meet your needs. The workshop can also be held together with students.

PLAYBOOK – GUIDE FOR THE OPTIMISED UTILISATION OF YOUR SPACES

Workshop where you are given tools for setting rules and guidelines for your learning spaces. The result is a practical playbook for you to agree on, which explains how the school should operate, making it easy to introduce new staff.

LAYOUT AND SPACE PLANNING

Together, we review your existing learning spaces and look at how they can be changed to better meet your needs. We provide advice on space and interior design planning.

PRODUCT ADVICE: ERGONOMICS, MATERIALS AND COLOURS

We have broad expertise in ergonomics and know which products, functions, materials and colours are best suited to different needs, activities and areas.

INVENTORY

We help you to make an inventory of existing furnishings in order to see what can be reused, renovated or updated. We ensure that old and new furniture are in harmony.

FURNITURE CARE/REUSE

Maintenance, refurbishment and updating of existing products for a long life cycle and sustainable circularity.
